1. About SBG Funding

Company overview

Source: https://sbgfunding.com/about-us/

SBG Funding is a New York City-based small business financing company founded in March 2017. It is a direct provider of revenue-based financing and also runs a marketplace that places other products (term loans, lines of credit, SBA financing, equipment, invoice and bridge financing) with lending partners in its network. One application reaches the full range of business financing instead of whatever a single lender happens to offer.

Key facts published by SBG Funding:

- More than $3 billion in financing delivered since 2017.
- More than 28,000 U.S. small businesses funded across more than 64,000 transactions.
- Financing from $5,000 to $10,000,000, available in all 50 states.
- Inc. 5000 honoree five years in a row (2022 to 2026), ranked #778 in 2026.
- Great Place to Work certification (2022).
- Brand promise: "Capital That Keeps Up" - the money moves as fast as the business does.
- Founder and CEO: Jeffrey Sachs. Legal entity: Mission Capital LLC.

How the SBG marketplace works

Source: https://sbgfunding.com/about-us/

SBG funds some products itself and arranges the rest through its lender network. The process has four parts:

- One application: apply once online with your four most recent business bank statements. There is no hard credit pull and no stack of paperwork.
- A dedicated advisor reviews it: an in-house SBG advisor (not an algorithm and not a call center) weighs revenue, cash flow, time in business and more than 50 other factors.
- You are matched to the right capital: when revenue-based financing fits best, SBG funds it directly; when a term loan, line of credit, equipment financing, invoice financing or SBA financing is the better tool, SBG places it with the right lender in its network.
- You get funded fast: decisions in as little as 24 hours and funding shortly after.

SBG is not a lead-generation site. Applicants are not passed to a call center or sold into a lead pool, and they keep one dedicated advisor for the life of their business.

Why business owners choose SBG

Source: https://sbgfunding.com/about-us/

- Your advisor has a name: one person owns your file from application through funding and is still there when you renew.
- SBG tells you when the answer is no: if the fit is wrong or the timing is early, the advisor says so and explains what would need to change.
- Checking costs nothing: no hard credit pull at any point, no fee and no obligation.
- Four bank statements, not a document pile: no tax returns, business plan or projections are needed to start.
- Someone picks up the phone: Relationship Managers are available Monday to Friday, 9am to 6pm Eastern, at 844-284-2725.

SBG compared with banks and typical online lenders

Source: https://sbgfunding.com/industries/restaurants/

Decision time - SBG Funding: Same day; Traditional bank: 2 to 8 weeks; Typical online lender: 1 to 3 days.

Credit check - SBG Funding: Soft pull only; Traditional bank: Hard inquiry; Typical online lender: Often a hard pull.

Minimum credit score - SBG Funding: 500+; Traditional bank: 680+; Typical online lender: Varies.

What is reviewed - SBG Funding: Revenue plus 50+ factors, human review; Traditional bank: Tax returns and financials; Typical online lender: Algorithm only.

Point of contact - SBG Funding: One dedicated advisor; Traditional bank: Loan committee; Typical online lender: Call center or portal.

Collateral - SBG Funding: None required on unsecured products; Traditional bank: Often required; Typical online lender: Sometimes.

Funding range - SBG Funding: $5K to $10M; Traditional bank: Often a $50K+ minimum; Typical online lender: Varies.

Banks rely on rigid credit thresholds and can take weeks. SBG evaluates more than 50 factors, funds in as little as 24 hours and approves businesses whose revenue and time-in-business profiles banks often decline. Most businesses SBG funds have been declined by at least one bank.

Contact SBG Funding

Source: https://sbgfunding.com/contact-us/

- Phone: 844-284-2725 (Relationship Managers and funding specialists).
- Hours: Monday to Friday, 9am to 6pm Eastern Time.
- Office: 240 W 40th Street, 8th Floor, New York, NY 10018.
- Online application: https://apply.sbgfunding.com/ (about 5 minutes).
- Existing customer portal: https://app.sbgfunding.com/login
- Contact form: https://sbgfunding.com/contact-us/

Applications submitted outside business hours are reviewed first thing the next business day.

Company history

Source: https://sbgfunding.com/about-us/

- 2017: Founded on March 21, 2017; deployed $7.9M in originations in the first months.
- 2018: 254% growth and $28M in originations.
- 2019: Launched Net Funding, SBG's direct balance-sheet arm; $67.5M in originations.
- 2020: Rebrand and new website; $70.8M in originations.
- 2021: Moved into a new headquarters; $90M in originations.
- 2022: First Inc. 5000 listing and Great Place to Work certification; $189M in originations.
- 2023: $287M in originations.
- 2024: $422M in originations; expanded in-house support and product teams.
- 2025: $794M in originations; two new NYC offices; top 1,000 of the Inc. 5000.
- 2026: Passed $3 billion in total financing, fifth straight Inc. 5000 (#778) and launched the "Capital That Keeps Up" brand.

2. Qualifying and applying

Minimum requirements

Source: https://sbgfunding.com/faqs/

To qualify with SBG Funding a business needs to meet four published minimums:

- Credit score: a business owner FICO score of 500 or higher.
- Time in business: at least 6 months of operating history.
- Revenue: $150,000 or more in gross revenue over the last 12 months (about $12,500 per month).
- Documents: the 4 most recent business bank statements.

Meeting all four means you can apply in about five minutes with no impact to your credit score. SBG evaluates more than 50 factors beyond credit, so strong revenue and consistent deposits can offset a lower score. A business HELOC is the exception: it requires a FICO score of 600 or higher and 6+ months in business, and because it is secured by the owner's home SBG lists no revenue minimum for it.

Can a new business qualify?

Source: https://sbgfunding.com/faqs/

Businesses with as little as 6 months of operating history can qualify; SBG looks at recent revenue and bank deposits rather than longevity. Businesses under 6 months old do not yet qualify. If you are in your first 6 months, SBG recommends applying once you cross that threshold with consistent monthly revenue.

Can I qualify with bad credit?

Source: https://sbgfunding.com/business-financing/bad-credit-business-loans/

Yes. SBG works with FICO scores as low as 500, and bad credit alone will not disqualify an application. Credit influences which products and terms you qualify for, but revenue, deposit consistency and time in business carry significantly more weight. Approvals in the 500 to 600 range rest on the strength of cash flow rather than the score. A FICO below 600 is not a ceiling on the amount; six-figure approvals rest on cash flow.

What documents do I need to apply?

Source: https://sbgfunding.com/faqs/

To start, you need only the quick online application and your 4 most recent business bank statements. No tax returns, business plan, projections or audited financials are required to begin. Some products ask for more later:

- SBA 7(a): typically 3 years of business and personal tax returns (for owners with 20%+ ownership), a year-to-date profit and loss statement, bank statements, SBA forms and purpose documents such as a purchase agreement. SBG provides a full checklist after the initial review.

- Equipment financing: details of the equipment (type, price and vendor if available).
- Invoice financing: copies of the outstanding invoices and proof the goods or services were delivered.
- Bridge capital: proof of the repayment source, such as a purchase agreement, commitment letter or contract.
- Business HELOC: home value and mortgage balance to start; later personal tax returns, a mortgage statement and documentation of the home's value.
- Larger amounts may require business tax returns or additional financial documents.

How the application works

Source: https://sbgfunding.com/

1. Apply online: complete the application in about 5 minutes with basic information about your business and financing needs.
2. Get approved: your advisor reviews the application and presents options matched to your profile, looking at revenue, deposit history and time in business, not just credit.
3. Receive your funds: once approved and documents are signed, funds can be in your business bank account in as little as 24 hours.

How quickly will I get a decision and funds?

Source: https://sbgfunding.com/faqs/

Most applications receive a decision the same business day, typically within 24 hours. Applications submitted after business hours, on weekends or on holidays get a response the next business day. Once approved, you can choose a same-day wire or a next-business-day ACH transfer. Same-day funding depends on your qualifications and on returning closing documents promptly. ACH moves only on banking business days. SBA financing is the exception: it typically closes in 30 to 90 days.

Will applying affect my credit score?

Source: https://sbgfunding.com/faqs/

No. SBG uses a soft credit pull to verify identity and states that it never performs a hard credit pull at any point in its approval process. Using SBG's online calculators touches no credit bureau at all.

Which states and industries does SBG serve?

Source: https://sbgfunding.com/faqs/

SBG Funding finances small businesses in all 50 states, and the application is fully online. SBG finances most industries; the main exceptions are adult entertainment and gambling. If you are unsure whether your business qualifies, call 844-284-2725.

Is this financing for business or personal use?

Source: https://sbgfunding.com/credit-application-terms/

SBG's financing is for business purposes only. Applicants confirm that the request is for business and not for consumer purposes. SBG does not offer personal loans, auto loans, student loans or home mortgages for personal use.

What if I already have financing with a bank?

Source: https://sbgfunding.com/faqs/

SBG's products are designed to work alongside traditional financing. If the business qualifies, SBG can provide funding without disrupting existing obligations. Applicants should avoid stacking several revenue-based advances from different providers at once, because overlapping daily payments are the most common reason businesses run into trouble with that kind of financing.

Is my information secure?

Source: https://sbgfunding.com/faqs/

SBG Funding states that protecting customer data is a top priority and that it uses secure data-privacy infrastructure that it keeps strengthening as technology evolves. Sensitive details such as Social Security numbers and bank account numbers are collected only through the secure application, never through chat.

3. Financing products

Products at a glance

Source: https://sbgfunding.com/business-financing/

Revenue-based financing - Amount: Sized to monthly revenue; Term: No set term; repaid from sales; Collateral: None; Speed: Decision same day, funds in about 24 hours.

Small business term loan - Amount: $5,000 to $10,000,000; Term: 6 to 48 months; Collateral: None; Speed: Decision same day, funds in about 24 hours.

Business line of credit - Amount: $5,000 to $500,000 limit; Term: Revolving, no fixed end date; Collateral: None; Speed: Same-day draws once approved.

Working capital - Amount: $5,000 to $10,000,000; Term: 3 to 24 months; Collateral: None; Speed: Decision same day, funds in about 24 hours.

SBA 7(a) financing - Amount: Up to $5,000,000; Term: 10 to 25 years; Collateral: May be required; Speed: Typically 30 to 90 days to close.

Equipment financing - Amount: Up to 90% of equipment value; Term: 24 to 60 months; Collateral: The equipment; Speed: Decision same day, funds in about 24 hours.

Invoice financing - Amount: Up to 90% of invoice value; Term: Per invoice; Collateral: The invoices; Speed: Decision same day, funds in about 24 hours.

Bridge capital - Amount: $5,000 to $10,000,000; Term: Weeks to several months; Collateral: None; Speed: Decision same day, funds in about 24 hours.

Business HELOC - Amount: Up to 85% of home value minus mortgage; Term: Revolving; Collateral: Your home; Speed: Can take longer than other products.

All products are subject to approval; rates and terms vary with the business profile.

Revenue-based financing

Source: https://sbgfunding.com/resources/unlock-business-potential-with-mca-loans/

Revenue-based financing (RBF) is SBG Funding's core direct product. The business receives a lump sum today in exchange for a share of its future sales, and repays an agreed total through small daily or weekly payments that are automatically debited from the business bank account. It is not a loan: there is no interest rate, and the total repayment is fixed when you sign.

- Sizing: based on average monthly deposits and how steady they are, read from the 4 most recent business bank statements.
- Cost: set with a factor rate, a multiplier on the amount funded. Example from SBG: a $50,000 advance at a 1.3 factor rate means $65,000 is repaid in total, and that number does not change.
- Term: no set term; repayment flexes with cash flow - more when sales are strong, less when they are slow.

- Requirements: FICO 500+, 6+ months in business and $150,000+ annual revenue. No collateral and no hard credit pull.
- Best for: urgent needs, uneven or seasonal revenue, limited collateral or credit history, and purchases that pay for themselves quickly (seasonal inventory, a marketing push with a measurable return, equipment that adds capacity right away).
- Trade-off: RBF is usually more expensive than a term loan or line of credit, so it works best for needs with a clear, near-term return. For ongoing needs a line of credit may fit better; for large planned investments compare a term loan or SBA 7(a).

Small business term loan

Source: https://sbgfunding.com/business-financing/small-business-term-loan/

A term loan provides a lump sum upfront that is repaid on a fixed schedule over a set term. It is best for a specific investment with a defined cost.

- Amount: $5,000 to $10,000,000.
- Term: 6 to 48 months; shorter 6 to 12 month terms are available for a defined payoff timeline.
- Payments: fixed weekly or monthly payments.
- Rates: starting at 1.25% per month; rates vary with the business profile.
- Collateral: none; term loans are unsecured.
- Fees: no upfront fees and no prepayment penalty; some programs offer early payoff discounts.
- Speed: same-day decisions; funds in as little as 24 hours after approval and signed documents.
- Best for: renovations, expansion, a second location, mobilizing on a new contract, a large tooling or inventory buy.

Business line of credit

Source: https://sbgfunding.com/business-financing/business-line-of-credit/

A business line of credit is revolving: draw what you need, repay it, and draw again. Interest is charged only on the outstanding drawn balance, never on the unused limit.

- Credit limit: $5,000 to $500,000. For amounts above $500,000 a term loan is the right product.
- Structure: revolving with no fixed end date; draws are deposited the same day once the line is active.
- Payments: weekly or monthly; the payment tracks what you owe and falls as you repay.
- Fees: a draw fee of up to 2% of each withdrawal; no maintenance, annual or inactivity fees.
- Collateral: none; the line is unsecured.
- Requirements: FICO 500+, 6+ months in business, $150,000+ annual revenue, 4 bank statements.
- Credit building: account activity is reported to business credit bureaus once the line is active.
- Limit increases: may be requested as the business grows and shows consistent repayment.
- Best for: payroll, inventory, bridging invoice gaps, equipment repairs and other recurring or unpredictable needs.

Working capital financing

Source: https://sbgfunding.com/business-financing/working-capital-loans/

Working capital financing is a fixed amount for one defined operating gap, sized at approval and repaid on a set schedule.

- Amount: $5,000 to $10,000,000.
- Term: 3 to 24 months with weekly or monthly payments.
- Use: any legitimate operating expense - payroll, inventory, rent, utilities, suppliers, marketing, repairs or taxes. You are not required to specify how funds will be spent.
- Collateral: none; working capital is unsecured.
- Seasonal businesses: SBG evaluates full annual revenue history rather than a single month, so a strong peak season counts.
- Versus a line of credit: choose working capital for a one-time, defined amount with a fixed payoff; choose a line of credit for recurring or variable needs.

SBA 7(a) financing

Source: https://sbgfunding.com/business-financing/sba-loans/

The SBA 7(a) program is the U.S. Small Business Administration's primary lending program. The SBA does not lend directly; it guarantees part of financing made by approved lenders, which allows larger amounts, longer terms and lower rates than conventional financing. SBG arranges SBA financing through its lending partners and guides the application.

- Amount: up to $5,000,000.
- Term: 10 to 25 years.
- Rates: tied to the prime rate and subject to SBA-mandated maximums that vary by size and term.
- Collateral: may be required depending on size and purpose. Financing under $50,000 typically does not require collateral; for larger amounts the SBA requires lenders to take available collateral, but insufficient collateral alone does not disqualify a strong application.
- Credit: SBG accepts applicants from 500, but SBA approval also applies SBA criteria. Scores of 650 and above are generally stronger candidates.
- Timeline: typically 30 to 90 days from application to funding - much slower than SBG's conventional products. If the need is urgent, a term loan may be the better fit.
- Eligibility: the business must operate for profit in the U.S., meet the SBA size standard for its industry, have reasonable owner equity, have exhausted other financing options and not be in an ineligible industry (such as gambling and certain financial businesses).
- Documents: start with the application and 4 bank statements; SBG then provides the full SBA checklist (tax returns, P&L, SBA forms, purpose documents).
- Best for: business acquisitions, large build-outs, buying real estate or a second location, and situations where long-term cost matters more than speed.

Equipment financing

Source: https://sbgfunding.com/business-financing/equipment-financing/

Equipment financing funds machinery, vehicles, technology and other physical business assets. The equipment itself serves as collateral, and you own it outright from day one.

- Amount: up to 90% of the equipment's value (loan-to-value).
- Term: 24 to 60 months (2 to 5 years) with fixed weekly or monthly payments; longer terms for larger, longer-lived assets.
- Collateral: the financed equipment only; no additional collateral. A personal guarantee may be required.
- New or used: both qualify; age and condition can affect the amount and term.
- Eligible assets: manufacturing machinery, commercial vehicles and fleets, medical and dental equipment, construction and heavy equipment, restaurant equipment, POS and technology systems.
- Documents: 4 bank statements plus the equipment's type, price and vendor.
- Credit: FICO 500+; because the equipment secures the financing, approval is often more accessible than unsecured financing.
- Versus leasing: with financing you own the equipment at the end; with a lease you pay to use it and may not own it.
- Versus a term loan: equipment financing is secured by the asset and runs 2 to 5 years matched to its useful life; a term loan runs 6 to 48 months and is flexible in purpose.

Invoice financing

Source: https://sbgfunding.com/business-financing/invoice-financing/

Invoice financing (accounts receivable financing) turns unpaid invoices from commercial customers into immediate working capital, so you stop waiting 30, 60 or 90 days to get paid.

- Advance: up to 90% of invoice value, depending on invoice quality and your customers' creditworthiness.
- Fees: 0.5% to 5% per month on the advanced amount, plus origination of 0% to 2%. Your specialist confirms the exact rate before you commit.
- Eligible invoices: issued to creditworthy commercial customers (businesses, government entities and organizations) for goods or services already delivered; undisputed and not pledged elsewhere. Consumer invoices are typically not eligible.
- Recourse: you repay the advance even if your customer does not pay.
- Confidential: customers are not notified and keep paying you directly.
- Credit: approval rests mainly on your customers' creditworthiness; SBG's minimum FICO of 500 still applies.
- Versus factoring: with financing you keep ownership of the invoices and collect yourself; factoring sells the invoices to a third party that collects from your customers.

Bridge capital

Source: https://sbgfunding.com/business-financing/bridge-capital/

Bridge capital is fast, short-term financing that covers a defined gap until a known repayment event: a closing, an expected payment or permanent financing.

- Amount: $5,000 to $10,000,000.
- Term: a few weeks to several months, tied to the repayment event.
- Collateral: none; bridge capital is unsecured.
- Underwriting: the clarity and certainty of the repayment source is the main factor. You should be able to say when and how the bridge will be repaid before applying.
- Common use: covering a deposit, earnest money or initial costs of a business acquisition while SBA financing closes.
- Documents: 4 bank statements plus evidence of the repayment source (purchase agreement, commitment letter or contract).
- Extensions: evaluated case by case and not guaranteed.

Business HELOC

Source: https://sbgfunding.com/business-financing/home-equity-line-of-credit-heloc/

A business home equity line of credit lets owners borrow against the equity in their primary residence for business purposes, usually at lower rates than unsecured business financing.

- Credit limit: typically up to 85% of the home's appraised value minus the existing mortgage balance. Example: a $500,000 home with a $250,000 mortgage could support a line of up to $175,000 (85% of $500,000 minus $250,000).
- Rate: usually variable and tied to the prime rate; some HELOCs offer a fixed-rate option on part of the balance.
- Collateral: your home. Draw responsibly and keep a repayment plan, because the home is at risk if the line is not repaid.
- Requirements: a FICO score of 600 or higher, at least 6 months in business and the 4 most recent business bank statements. SBG lists no $150,000 revenue minimum for the HELOC because it is secured by the home.
- Speed: can take longer than SBG's other products.
- If you sell the home, the HELOC balance must be paid off at closing.
- SBG suggests a HELOC when a business does not yet match its other programs but the owner has home equity.

4. Choosing the right financing

Quick guide by need

Source: https://sbgfunding.com/business-financing/

A recurring cash gap (payroll, slow weeks, restocking) - Usually the best fit: Business line of credit; Also consider: Working capital, revenue-based financing.

One defined operating gap with a fixed payoff - Usually the best fit: Working capital; Also consider: Term loan.

A specific investment (renovation, expansion, second location) - Usually the best fit: Small business term loan; Also consider: SBA 7(a).

Machinery, vehicles or technology - Usually the best fit: Equipment financing; Also consider: Term loan.

Cash tied up in unpaid B2B invoices - Usually the best fit: Invoice financing; Also consider: Line of credit.

A gap until a closing or known payout - Usually the best fit: Bridge capital; Also consider: Line of credit.

Buying a business or real estate - Usually the best fit: SBA 7(a); Also consider: Bridge capital while SBA closes.

Money today for an emergency - Usually the best fit: Revenue-based financing; Also consider: Working capital, line of credit.

Lowest cost with home equity available - Usually the best fit: Business HELOC; Also consider: SBA 7(a).

If you know exactly what you need and how much it costs, a term loan is typically the right fit. If the need is ongoing or unpredictable, a line of credit is usually cheaper and more flexible.

Term loan or line of credit?

Source: https://sbgfunding.com/line-of-credit-calculator/

A term loan provides a lump sum upfront repaid on a fixed schedule; it suits one known amount with a defined purpose and a fixed payoff. A line of credit gives revolving access you draw from, repay and draw again, paying only on what you have drawn; it suits recurring or unpredictable costs such as payroll between invoices or seasonal inventory. If you can name the amount and the date you need it by, a term loan is usually the cheaper structure.

Working capital or line of credit?

Source: https://sbgfunding.com/business-financing/working-capital-loans/

Working capital delivers a lump sum with a fixed repayment schedule, best when you know how much you need and want a defined payoff timeline. A line of credit is best for ongoing or variable needs. If the working capital need is a one-time, defined amount, working capital is simpler; if it recurs and varies, a line of credit is more efficient.

Revenue-based financing or a term loan?

Source: https://sbgfunding.com/resources/factor-rate-vs-interest-rate/

Revenue-based financing is priced with a factor rate and repaid from sales through small daily or weekly payments; approval rests mostly on revenue, and it funds fast, but it usually costs more and early repayment does not reduce the fixed total. Term loans and lines of credit use interest rates that accrue on the outstanding balance, so paying early can save money. RBF fits short-term, urgent or uneven-revenue needs; interest-rate products fit longer-term, planned investments.

SBA 7(a) or conventional financing?

Source: https://sbgfunding.com/business-financing/sba-loans/

SBA financing offers larger amounts, longer terms and lower rates, but it needs more documentation and typically takes 30 to 90 days. SBG's conventional products fund in as little as 24 hours with minimal documentation. SBA is usually better for acquisitions, large capital needs and situations where long-term cost matters more than speed. Conventional financing is better for urgent needs, smaller amounts, or businesses that do not meet SBA criteria. Bridge capital can cover an acquisition deposit while SBA financing closes.

Equipment financing or a term loan?

Source: https://sbgfunding.com/business-financing/equipment-financing/

Both provide a lump sum with fixed repayment. Equipment financing is secured by the asset, needs no other collateral, often has more flexible approval and runs 2 to 5 years matched to the equipment's useful life. A term loan runs 6 to 48 months and can be used for any purpose.

Invoice financing or a line of credit?

Source: https://sbgfunding.com/business-financing/invoice-financing/

Invoice financing advances cash against specific unpaid commercial invoices; a line of credit gives general revolving working capital. They can be used together: many businesses use invoice financing for their largest invoice gaps and a line of credit for day-to-day cash flow.

Bridge capital or a line of credit?

Source: https://sbgfunding.com/business-financing/bridge-capital/

A line of credit covers ongoing or recurring needs. Bridge capital is a single, defined advance for a specific gap with a known repayment event. If the gap is one-time and time-bounded with a clear exit, bridge capital is the right tool.

HELOC or a home equity loan?

Source: https://sbgfunding.com/business-financing/home-equity-line-of-credit-heloc/

A HELOC is revolving: draw, repay and draw again, paying interest only on the outstanding balance. A home equity loan is a lump sum with fixed repayment, like a term loan. For ongoing or variable needs a HELOC is more flexible; for one specific purchase a home equity loan may fit better.

Financing with bad credit

Source: https://sbgfunding.com/business-financing/bad-credit-business-loans/

SBG accepts FICO scores from 500 across its products (600 for a HELOC). Approvals in the 500 to 600 range rest on cash flow and deposit history. Invoice financing and equipment financing are often the most accessible with imperfect credit, because approval leans on customers' credit or on the asset. Rates vary with the overall profile; the way to see a specific rate is to apply, which takes 5 minutes and does not affect credit.

Financing without collateral

Source: https://sbgfunding.com/business-financing/no-collateral-business-loans/

Most SBG products are fully unsecured: term loans, lines of credit, bridge capital, working capital and revenue-based financing require no collateral. Three products can involve collateral: equipment financing (the equipment), a HELOC (your home) and SBA 7(a) (may be required by the lender). Unsecured financing may still involve a UCC filing, a public notice of a security interest in business assets; it does not attach to your home, car or personal property. A personal guarantee may apply depending on the product and amount; your advisor explains the terms before you sign.

Emergency and fast funding

Source: https://sbgfunding.com/business-financing/emergency-business-loans/

For equipment failures, payroll shortfalls, supply disruptions, unexpected taxes or delayed receivables, SBG makes same-day decisions on most applications. If you apply during business hours and are approved, documents can be signed the same day and funds deposited within 24 hours. You do not need to prove the nature of the emergency. Applications made on weekends or holidays are reviewed the next business day. The fastest products are term loans, lines of credit, bridge capital, working capital and revenue-based financing; SBA financing is not a fast option.

Turned down by a bank?

Source: https://sbgfunding.com/business-financing/fast-business-loans/

Most businesses SBG funds have been declined by at least one bank. Bank declines usually come from rigid credit thresholds, documentation requirements or slow timelines rather than the health of the business. If the business has $150,000+ in annual revenue and at least 6 months of operating history, SBG can likely help regardless of the bank's answer.

5. Industries SBG serves

How industry affects financing

Source: https://sbgfunding.com/industries/

SBG structures financing around how each sector's cash flow actually works rather than a generic credit box. It finances most industries; adult entertainment and gambling are excluded. The sections below list the products SBG recommends most often for each sector and what each is typically used for. Businesses outside these sectors (for example fitness, telecommunications, home technology, agriculture or professional services) are also funded.

Automotive services financing

Source: https://sbgfunding.com/industries/automotive-services/

Typical challenge: The bays are full. The parts order is overdue. Payroll is Monday.

Recommended products:

- Business Term Loan: Adding a service bay, shop expansion, a second location. Term: 6-48 months; minimum FICO 500.
- Business Line of Credit: Parts inventory, payroll, day-to-day operating costs. Term: Revolving; minimum FICO 500.
- Equipment Financing: Lifts, diagnostic tools, tire equipment, paint booths. Term: 2-5 years; minimum FICO 500.
- Invoice Financing: Unlocking cash from fleet accounts and commercial clients. Term: Per invoice; approval based on your customers' credit.
- Working Capital: One large parts order or slow stretch, with a fixed payoff date. Term: 3-24 months; minimum FICO 500.

Common uses:

- Shop Equipment and Lifts: Two-post lifts, alignment racks, diagnostic scanners, and tire machines are essential, and expensive.
- Parts and Inventory: Stocking the right parts means faster turnaround and more completed jobs per day.
- Technician Payroll: Skilled technicians are your most valuable resource and the hardest to replace.
- Paint Booth and Body Shop Equipment: Adding collision repair capability significantly expands your revenue potential.
- Fleet and Commercial Account Gaps: Fleet accounts and commercial clients provide steady volume but typically pay on net-30 terms.
- Shop Expansion or Relocation: Growing into a larger facility or opening a second location requires lease deposits, build-out costs, and equipment, all before new revenue arrives.

Beauty and wellness financing

Source: https://sbgfunding.com/industries/beauty-wellness/

Typical challenge: Every chair that's empty is revenue you'll never get back.

Recommended products:

- Business Term Loan: Salon renovations, adding treatment rooms, a second location build-out. Term: 6-48 months; minimum FICO 500.
- Business Line of Credit: Retail product inventory, stylist payroll, slow-season costs. Term: Revolving; minimum FICO 500.
- Equipment Financing: Salon chairs, treatment tables, laser equipment, washstations. Term: 2-5 years; minimum FICO 500.
- SBA 7(a) financing: Salon acquisitions, spa build-outs, or a second location. Term: 10-25 years; credit set by the SBA lender.
- Working Capital: A single post-build-out gap, sized upfront and repaid on schedule. Term: 3-24 months; minimum FICO 500.

Common uses:

- Salon Chairs and Equipment: Styling chairs, washstations, dryer hoods, and treatment tables are the core of your revenue-generating capacity.
- Spa and Treatment Equipment: Laser hair removal systems, microdermabrasion equipment, massage tables, pedicure chairs, and skincare technology are significant investments that expand your service menu and revenue potential.
- Salon Renovation or Refresh: A refreshed interior drives client retention and attracts new business.
- Retail Product Inventory: Professional hair care, skincare, and beauty products are a high-margin revenue stream, but the inventory has to be stocked before it sells.
- Hiring and Onboarding Stylists: Adding a licensed stylist, esthetician, or massage therapist expands your capacity immediately, but there's a ramp period before their chair is fully booked.
- Second Location or Acquisition: Opening a second salon or buying an established one is the fastest path to doubling revenue in beauty and wellness.

Construction financing

Source: https://sbgfunding.com/industries/construction/

Typical challenge: Your clients pay on their schedule. Your crew can't wait

Recommended products:

- Business Term Loan: Mobilizing on a new contract, crew expansion, a yard purchase. Term: 6-48 months; minimum FICO 500.
- Business Line of Credit: Materials and subcontractor payments between progress draws. Term: Revolving; minimum FICO 500.
- Equipment Financing: Excavators, cranes and fleet trucks, financed over the life of the asset. Term: 2-5 years; minimum FICO 500.

- Invoice Financing: Unlocking cash from approved progress draws and GC invoices. Term: Per invoice; approval based on your customers' credit.
- Working Capital: A known gap between projects, funded as one lump sum. Term: 3-24 months; minimum FICO 500.

Common uses:

- Equipment Purchases: Excavators, cranes, forklifts, and heavy machinery are among the largest capital outlays a construction business makes.
- Payroll Between Projects: Your crew gets paid every week.
- Materials and Supplies: Lumber, concrete, steel, and specialty materials often need to be purchased before any payment arrives.
- Subcontractor Payments: Subs expect payment on their terms, not your client's timeline.
- Bonding and Insurance: Commercial and government contracts often require performance bonds and specific coverage levels before work begins.
- Business Expansion: Growing in construction means capital for additional crews, fleet vehicles, upgraded equipment, or the runway to bid larger projects.

Dental practices financing

Source: https://sbgfunding.com/industries/dental/

Typical challenge: You treat patients all week. The insurance company reviews your claims monthly.

Recommended products:

- Business Term Loan: Operatory build-outs, practice management software, working capital for a new hire. Term: 6-48 months; minimum FICO 500.
- Business Line of Credit: Bridging insurance reimbursement gaps and covering payroll. Term: Revolving; minimum FICO 500.
- Equipment Financing: Dental chairs, X-ray units, CBCT scanners, CAD/CAM systems. Term: 2-5 years; minimum FICO 500.
- SBA 7(a) financing: Practice acquisition, major buildouts, and second locations. Term: 10-25 years; credit set by the SBA lender.
- Invoice Financing: Advancing payment on submitted insurance claims. Term: Per invoice; approval based on your customers' credit.

Common uses:

- Practice Acquisition: Buying into an established practice, transitioning from associate to owner, or acquiring a retiring dentist's patient base is among the largest capital decisions in dentistry.
- Imaging & Diagnostic Equipment: Digital X-ray systems, CBCT cone beam scanners, and intraoral cameras are the highest-ROI technology investments in modern dentistry.
- CAD/CAM & Digital Workflow: Same-day crown milling, digital impression systems, and practice management software upgrades reduce lab costs and increase case acceptance.
- Associate & Staff Hiring: Bringing on an associate dentist or additional hygienist before their production fully covers their cost is a calculated investment in capacity.

- Second Location Buildout: A second location is the highest-leverage growth move for a full dental practice.
- Insurance Reimbursement Float: Invoice financing against submitted claims, or a business line of credit, bridges the gap between treatment delivery and insurance payment.

Food trucks financing

Source: https://sbgfunding.com/industries/food-trucks/

Typical challenge: The truck is the business. Financing it shouldn't be harder than running it.

Recommended products:

- Business Term Loan: Kitchen build-out, commissary deposits, initial operating capital. Term: 6-48 months; minimum FICO 500.
- Business Line of Credit: Food inventory, commissary fees, and event supply costs. Term: Revolving; minimum FICO 500.
- Equipment Financing: The truck itself, generators, and commercial kitchen equipment. Term: 2-5 years; minimum FICO 500.
- SBA 7(a) financing: Multi-truck expansion or transitioning into a brick-and-mortar location. Term: 10-25 years; credit set by the SBA lender.
- Working Capital: One slow-season stretch, sized upfront with a fixed payoff date. Term: 3-24 months; minimum FICO 500.

Common uses:

- Truck Purchase or Upgrade: Buy a new or used truck, finance a custom build-out, or upgrade an existing vehicle's kitchen equipment.
- Kitchen Equipment & Generator: Commercial fryers, griddles, refrigeration units, and generators are major capital items that determine what your menu can offer.
- Permits, Licenses & Commissary: Health permits, business licenses, fire inspection fees, and commissary agreements are non-negotiable operating costs that arrive annually.
- Food & Ingredient Inventory: Stocking up for a busy weekend, a festival run, or a large catering event requires more inventory than your daily operating balance typically holds.
- Second Truck or New Territory: A second truck opens new routes, new events, and new revenue streams simultaneously.
- Brick-and-Mortar Transition: Many successful food truck operators eventually open a permanent location.

Gas stations financing

Source: https://sbgfunding.com/industries/gas-stations/

Typical challenge: The fuel business runs on volume. Your financing should keep up with it.

Recommended products:

- Business Term Loan: Canopy upgrades, c-store renovation, site improvements. Term: 6-48 months; minimum FICO 500.

- Business Line of Credit: Fuel inventory purchases, c-store restocking, utility and card-fee cycles. Term: Revolving; minimum FICO 500.
- Equipment Financing: Fuel dispensers, POS systems, car wash equipment. Term: 2-5 years; minimum FICO 500.
- SBA 7(a) financing: Property acquisition, major renovations, franchise fees. Term: 10-25 years; credit set by the SBA lender.
- Bridge Capital: Closing on a site purchase before your SBA financing funds. Term: Weeks to months; minimum FICO 500.

Common uses:

- Fuel Dispenser Replacement: Dispensers have a lifespan, and EMV compliance, card reader upgrades, and general wear eventually require replacement.
- UST Compliance and Testing: EPA and state regulations require ongoing UST maintenance, testing, and eventual replacement.
- C-Store Renovation: An updated c-store layout, expanded food service, or refreshed product mix can significantly increase in-store revenue.
- Fuel Inventory Purchases: Fuel distributors require payment in 7–15 days.
- Car Wash Systems: An attached car wash is one of the highest-margin services a gas station can offer.
- Canopy, Signage, and Curb Appeal: A well-maintained canopy, updated signage, and a clean exterior directly impact customer volume.

HVAC financing

Source: https://sbgfunding.com/industries/hvac/

Typical challenge: New equipment. Slow season. Crew to pay. The timing never lines up.

Recommended products:

- Business Term Loan: Expanding into new install territory, opening a second depot. Term: 6-48 months; minimum FICO 500.
- Business Line of Credit: Unit and parts inventory ahead of peak season, tech payroll. Term: Revolving; minimum FICO 500.
- Equipment Financing: HVAC systems, diagnostic tools, service vehicles. Term: 2-5 years; minimum FICO 500.
- Invoice Financing: Unlocking cash from unpaid commercial job invoices. Term: Per invoice; approval based on your customers' credit.
- Working Capital: A single large commercial install, sized upfront with a fixed payoff. Term: 3-24 months; minimum FICO 500.

Common uses:

- Technician Payroll: Skilled HVAC technicians are expensive to recruit and hard to replace.
- HVAC Equipment and Systems: Purchasing inventory such as systems, units and components ahead of the busy season is standard practice, but it requires capital before the jobs are booked.

- Service Vehicles: Every additional service vehicle expands your capacity and revenue potential.
- Commercial Job Deposits and Materials: Large commercial installs require significant upfront spending on equipment and materials before the job starts.
- Technician Training and Certifications: EPA certifications, NATE credentials, and manufacturer training keep your team competitive and your business compliant.
- Business Expansion: Adding service areas, hiring additional crews, or opening a second location are all high-leverage growth moves, and all require capital before the new revenue arrives.

Healthcare and medical practices financing

Source: https://sbgfunding.com/industries/healthcare/

Typical challenge: Your patients come first. Your cash flow shouldn't be an afterthought.

Recommended products:

- Business Term Loan: Build-outs, adding exam rooms, opening a second office. Term: 6-48 months; minimum FICO 500.
- Business Line of Credit: Payroll gaps between reimbursements, recurring operating costs. Term: Revolving; minimum FICO 500.
- Equipment Financing: Medical equipment, diagnostic tools, imaging systems. Term: 2-5 years; minimum FICO 500.
- SBA 7(a) financing: Buying into or acquiring a practice, up to $5M. Term: 10-25 years; credit set by the SBA lender.
- Invoice Financing: Advancing payment on outstanding insurance and payer claims. Term: Per invoice; approval based on your customers' credit.

Common uses:

- Payroll and Staffing Costs: Staff salaries are the largest expense in most practices, and the least flexible.
- Medical Equipment Purchases: Diagnostic tools, imaging systems, surgical equipment, and patient monitoring devices are expensive and non-negotiable.
- Facility Renovations and Upgrades: A modernized waiting room, new exam rooms, ADA compliance updates, or HVAC and electrical upgrades all require capital that may not be sitting in your operating account.
- Hiring Additional Staff: Growing patient volume, expanding service lines, or covering a departure often means hiring quickly.
- Technology and EHR Systems: Electronic health record systems, telehealth platforms, patient scheduling software, and billing infrastructure are essential, and expensive to implement or upgrade.
- Opening a Second Location: Expanding into a second practice location requires lease deposits, build-out costs, equipment, and enough working capital to carry the new location through its first months.

Manufacturing financing

Source: https://sbgfunding.com/industries/manufacturing/

Typical challenge: Your production line doesn't stop. Your cash flow can't either.

Recommended products:

- Business Term Loan: Plant expansion, facility build-out, a large tooling buy. Term: 6-48 months; minimum FICO 500.
- Business Line of Credit: Raw materials, payroll, recurring production costs. Term: Revolving; minimum FICO 500.
- Equipment Financing: CNC machines, industrial equipment, production line upgrades. Term: 2-5 years; minimum FICO 500.
- Invoice Financing: Unlocking cash from net-30/60/90 commercial invoices. Term: Per invoice; approval based on your customers' credit.
- Working Capital: One large production run, repaid when that order settles. Term: 3-24 months; minimum FICO 500.

Common uses:

- Raw Materials and Inventory: Materials must be purchased and on-hand before production begins, often weeks before any revenue arrives.
- Production Payroll: Skilled machinists, assemblers, quality control staff, and floor supervisors expect consistent pay regardless of where a customer's net-60 invoice stands.
- Equipment Purchases and Upgrades: CNC machines, industrial presses, laser cutters, and automated assembly equipment are among the largest capital investments a manufacturer makes.
- Large Purchase Order Fulfillment: A significant purchase order is only valuable if you can fulfill it.
- Bridging Net-30/60/90 Payment Terms: Commercial buyers pay on their terms, not yours.
- Facility Expansion: Adding production capacity, whether through a larger facility, additional equipment or a second shift, requires upfront capital before the new revenue materializes.

Plumbing financing

Source: https://sbgfunding.com/industries/plumbing/

Typical challenge: Burst pipes at 2 a.m. Supply bills Friday. Paid next month.

Recommended products:

- Business Term Loan: Mobilizing crew and materials for a new construction subcontract. Term: 6-48 months; minimum FICO 500.
- Business Line of Credit: Payroll and supply runs between commercial draw payments. Term: Revolving; minimum FICO 500.
- Equipment Financing: Service vans, sewer cameras, hydro-jetting units. Term: 2-5 years; minimum FICO 500.
- Invoice Financing: Unpaid GC and property-manager invoices on net-30 to net-60. Term: Per invoice; approval based on your customers' credit.

- Working Capital: One slow residential stretch, sized upfront with a fixed payoff. Term: 3-24 months; minimum FICO 500.

Common uses:

- Service Vans: One more stocked van means one more technician's route and the calls you can't cover today.
- Sewer Cameras and Leak Detection: Camera inspections and electronic leak detection turn guesswork into billable diagnostic work, especially on commercial accounts.
- Hydro-Jetting Equipment: Jetting clears what a snake can't, and it's work many shops still send to a competitor.
- Pipe, Fittings and Materials: New construction and large commercial jobs need materials bought before work begins.
- Hiring Licensed Plumbers: The <a href="https://www.bls.gov/ooh/construction-and-extraction/plumbers-pipefitters-and-steamfitters.htm" target="_blank" rel="noopener">U.S.
- Emergency Season Surge: Frozen and burst pipes in winter, water heater failures and backups any time: emergency demand arrives all at once.

Restaurants financing

Source: https://sbgfunding.com/industries/restaurants/

Typical challenge: Your tables fill up on weekends. Your bills don't wait for them.

Recommended products:

- Business Term Loan: Dining room renovation, a patio build-out, a second location. Term: 6-48 months; minimum FICO 500.
- Business Line of Credit: Food and beverage inventory, payroll through slow weeks. Term: Revolving; minimum FICO 500.
- Equipment Financing: Commercial kitchen equipment, refrigeration, POS. Term: 2-5 years; minimum FICO 500.
- SBA 7(a) financing: Buying an existing restaurant or a full build-out, up to $5M. Term: 10-25 years; credit set by the SBA lender.
- Bridge Capital: Closing on an acquisition before your SBA financing funds. Term: Weeks to months; minimum FICO 500.

Common uses:

- Payroll and Staffing Costs: Labor is the largest controllable expense in any restaurant.
- Kitchen Equipment and Appliances: Commercial ranges, refrigeration units, fryers, and dishwashers are expensive and non-negotiable.
- Renovations and Remodels: A refreshed dining room, an expanded bar, or a modernized kitchen can drive meaningful revenue increases, but the upfront cost is real.
- Inventory and Food Costs: Perishable inventory must be purchased regularly, and high-volume periods require buying significantly ahead of demand.

- Marketing and Seasonal Promotions: A well-timed marketing push, whether a grand opening, a seasonal menu launch or a local advertising campaign, can drive a meaningful revenue lift.
- Second Location or Franchise: Opening a second location is one of the highest-leverage growth moves in the restaurant industry, and one of the most capital-intensive.

Retail financing

Source: https://sbgfunding.com/industries/retail/

Typical challenge: Peak season comes once a year. Running out of stock isn't an option.

Recommended products:

- Business Term Loan: Store renovations, fixture upgrades, a seasonal inventory build. Term: 6-48 months; minimum FICO 500.
- Business Line of Credit: Inventory restocking, payroll, day-to-day operating costs. Term: Revolving; minimum FICO 500.
- Equipment Financing: POS systems, display fixtures, refrigeration, specialty equipment. Term: 2-5 years; minimum FICO 500.
- SBA 7(a) financing: Acquiring a store, opening a second location, or buying your building, up to $5M. Term: 10-25 years; credit set by the SBA lender.
- Working Capital: A post-peak dip, repaid before the next buying season. Term: 3-24 months; minimum FICO 500.

Common uses:

- Inventory Purchases: Inventory is the engine of every retail business, and it has to be paid for before it sells.
- Payroll and Staffing: Retail staffing costs spike during peak seasons and don't always align with when cash from those seasons is fully collected.
- Store Renovation and Fixtures: A refreshed store environment drives more sales.
- POS and Technology Upgrades: Modern POS systems, inventory management software, e-commerce integrations, and customer loyalty platforms improve both operations and sales, but they carry real upfront costs.
- Marketing and Seasonal Promotions: A well-timed promotional push, whether a grand opening, a seasonal sale campaign or a local advertising buy, can drive meaningful foot traffic.
- Opening a Second Location: Expanding to a second retail location requires lease deposits, build-out costs, initial inventory, and enough working capital to carry the new store through its first months.

Roofing financing

Source: https://sbgfunding.com/industries/roofing/

Typical challenge: Your crew is on the roof. The materials are on the truck. The adjuster is still reviewing the claim.

Recommended products:

- Business Term Loan: Bulk shingle and material buys, or a yard and storage build-out. Term: 6-48 months; minimum FICO 500.
- Business Line of Credit: Material drops and crew payroll before a job invoices. Term: Revolving; minimum FICO 500.
- Equipment Financing: Lift equipment, dump trucks, ladder racks, compressors. Term: 2-5 years; minimum FICO 500.
- Invoice Financing: Unlocking cash from insurance and GC invoices on closed jobs. Term: Per invoice; approval based on your customers' credit.
- Working Capital: A single large mobilization, sized upfront with a fixed payoff. Term: 3-24 months; minimum FICO 500.

Common uses:

- Bulk Materials Purchase: Buy shingles, underlayment, flashing, and decking in volume before your busy season, or to front multiple simultaneous jobs.
- Trucks & Equipment: Add a dump truck, box truck, or service van.
- Seasonal Crew Expansion: Storm season and spring ramp-up require more labor than your winter core crew can handle.
- Insurance Claim Float: Homeowner insurance jobs are your most reliable work, and your slowest-paying.
- Commercial Contract Advance: Win a large commercial job and need to front materials, mobilization, and labor before the first draw payment?.
- Equipment Repair & Replacement: A broken lift or grounded truck during peak season isn't a scheduling problem.

Trucking and transportation financing

Source: https://sbgfunding.com/industries/trucking-transportation/

Typical challenge: Your load delivered. Your invoice unpaid for 45 days.

Recommended products:

- Business Term Loan: Terminal or yard build-out, authority expansion, insurance and licensing costs. Term: 6-48 months; minimum FICO 500.
- Business Line of Credit: Fuel costs, driver payroll, recurring operating expenses. Term: Revolving; minimum FICO 500.
- Equipment Financing: Semi trucks, trailers, lift gates, specialty rigs. Term: 2-5 years; minimum FICO 500.
- Invoice Financing: Unlocking cash from unpaid freight invoices. Term: Per invoice; approval based on your customers' credit.
- Working Capital: A gap between contracts, sized upfront with a fixed payoff. Term: 3-24 months; minimum FICO 500.

Common uses:

- Fuel Costs: Fuel is the largest variable expense in any trucking operation.

- Driver Payroll: Drivers expect to be paid on a consistent schedule regardless of when invoices clear.
- Truck Repairs and Maintenance: Breakdowns and DOT compliance repairs are unavoidable.
- Fleet Expansion: Adding a truck or trailer directly increases revenue capacity.
- Freight Invoice Gaps: Brokers and shippers pay on their timeline, not yours.
- Licensing, Permits, and Compliance: DOT registration, IFTA permits, operating authority, and insurance renewals are recurring costs that don't align with your load schedule.

Veterinary practices financing

Source: https://sbgfunding.com/industries/veterinarian/

Typical challenge: A $12,000 surgery. Pet insurance pays in 45 days. Payroll is Friday.

Recommended products:

- Business Term Loan: Adding exam or surgical suites, kennel expansion, a second location. Term: 6-48 months; minimum FICO 500.
- Business Line of Credit: Pharmacy and surgical supply restocking, technician payroll. Term: Revolving; minimum FICO 500.
- Equipment Financing: Surgical equipment, imaging systems, dental units, lab analyzers. Term: 2-5 years; minimum FICO 500.
- SBA 7(a) financing: Acquiring a practice or buying out a retiring partner, up to $5M. Term: 10-25 years; credit set by the SBA lender.
- Invoice Financing: Advancing payment on pet insurance and third-party claims. Term: Per invoice; approval based on your customers' credit.

Common uses:

- Payroll and Staff Costs: Veterinarians, licensed technicians, and support staff are the largest expense in most practices, and the least negotiable.
- Veterinary Equipment: Imaging systems, surgical tables, anesthesia machines, and in-house diagnostics are non-negotiable for a full-service practice.
- Facility Renovations: A modernized reception area, additional exam rooms, a new surgical suite, or isolation ward expansion all require capital that may not be available in your operating account.
- Pharmaceuticals and Supplies: Medications, anesthesia supplies, surgical materials, and vaccines must be on hand before any case walks through the door.
- Hiring Additional Staff: Adding a DVM, hiring licensed technicians, or expanding your support team to meet growing patient volume all require upfront investment before the new capacity is fully reflected in revenue.
- Practice Acquisition or Second Location: Acquiring an established practice or opening a second location requires lease deposits, build-out costs, equipment, and working capital to carry the new location through its first months.

6. Costs, payments and estimates

Factor rates and interest rates

Source: https://sbgfunding.com/resources/factor-rate-vs-interest-rate/

A factor rate is a decimal multiplier, typically between 1.1 and 1.5, applied to the amount funded to set the total repayment upfront. Example: $10,000 at a 1.2 factor rate means $12,000 is repaid. Factor rates are used for short-term financing such as revenue-based financing and some bridge financing; payments are usually daily or weekly, and repaying early does not lower the fixed total. An interest rate is a percentage that accrues over time on the outstanding balance and is usually quoted annually (APR); it is used for term loans, lines of credit and SBA financing, and early repayment saves interest. Factor-rate financing is generally more expensive but faster and easier to qualify for.

Payment versus total cost

Source: https://sbgfunding.com/sbgfunding-calculator/

The payment is what leaves your account each period. The total cost is everything you repay over the whole term, including fees, minus the amount you received. Comparing offers on payment alone can be misleading, because a longer term lowers the payment while raising the total cost. SBG's calculator shows both for that reason.

Fees at a glance

Source: https://sbgfunding.com/business-financing/

- Upfront fees: none on SBG's core products.
- Application: free, no obligation, soft credit pull only.
- Line of credit: a draw fee of up to 2% per withdrawal; no maintenance, annual or inactivity fees.
- Invoice financing: 0.5% to 5% per month on the advanced amount plus 0% to 2% origination.
- Prepayment: many products have no prepayment penalty, and some offer prepayment discounts or interest forgiveness; your agreement spells out the specifics.
- Term loans: rates start at 1.25% per month and vary with the business profile.
- SBA 7(a): rates tied to the prime rate with SBA-mandated caps.

How SBG's funding calculator estimates an offer

Source: https://sbgfunding.com/sbgfunding-calculator/

SBG's public funding calculator gives an instant estimate of the funding amount, payment and total cost from three inputs: time in business, credit score and monthly revenue. Each input earns points, the total places the profile in a pricing tier, and the tier sets a revenue multiplier, a rate factor, a term and a payment frequency. Higher tiers allow a larger multiple of monthly revenue, longer terms (12 to 36 months) and less frequent payments (weekly, twice monthly or monthly). Profiles below the lowest tier do not get an automatic estimate; the calculator then suggests other options such as a HELOC and talking with a funding advisor. If you request less than the maximum, the estimate shows payments for

your requested amount.

The estimate is a model, not an offer. A real offer comes from reviewing your 4 most recent business bank statements against more than 50 data points. An estimate cannot see a signed contract, a seasonal pattern or a strong month that has not landed yet; if the figure looks low, that is usually what is missing, and a funding advisor can size the offer against what the model could not read.

How SBG's line of credit calculator works

Source: https://sbgfunding.com/line-of-credit-calculator/

The line of credit calculator estimates a credit limit, a monthly payment and a monthly rate from monthly revenue. The limit is what you can draw, not what you owe: a $100,000 limit with nothing drawn costs nothing, and the monthly rate applies only to the drawn balance. The payment moves with the balance - draw more and it rises, repay and it falls. Lines of credit run from $5,000 to $500,000; for larger amounts a term loan is the right product.

Collateral, UCC filings and personal guarantees

Source: https://sbgfunding.com/business-financing/no-collateral-business-loans/

Collateral is a specific asset pledged to secure financing. SBG's unsecured products (term loans, lines of credit, working capital, bridge capital and revenue-based financing) require none. A UCC filing is a public notice that a lender holds a security interest in business assets; it is standard in business financing and does not attach to personal property such as your home or car. A personal guarantee means the owner agrees to be personally responsible if the business cannot repay; whether one applies depends on the product and amount, and your advisor explains the terms before you sign.

How much can I borrow?

Source: https://sbgfunding.com/faqs/

SBG offers financing from $5,000 to $10 million depending on the product and qualifications. Lines of credit go up to $500,000 and SBA financing up to $5 million; equipment financing covers up to 90% of the equipment's value and invoice financing up to 90% of invoice value. The approved amount is driven mainly by monthly revenue, deposit consistency, time in business and the overall profile. Larger amounts are available through SBG's financing marketplace.

Do you offer monthly payments?

Source: https://sbgfunding.com/faqs/

Yes. Monthly repayment options are available for qualifying businesses, and the structure depends on the product. Term loans and working capital offer weekly or monthly payments; revenue-based financing is repaid through automatic daily or weekly debits.

7. Existing customers

Customer portal and account questions

Source: https://sbgfunding.com/faqs/

Every SBG customer gets online portal access at https://app.sbgfunding.com/login showing the outstanding balance, payment history and renewal eligibility. For anything else, call 844-284-2725 to reach your Relationship Manager (Monday to Friday, 9am to 6pm Eastern). Account-specific questions such as balances, payoff amounts or payment changes are handled by your Relationship Manager or through the portal, because they require verifying your identity.

How payments work

Source: https://sbgfunding.com/faqs/

For revenue-based financing, the business bank account is debited automatically based on the amount and frequency in the agreement, so there is nothing to track or remember. Other products follow the repayment schedule set in the agreement, weekly or monthly.

Paying off early

Source: https://sbgfunding.com/faqs/

You can repay financing, an advance or a line of credit at any time. Depending on the agreement, you may qualify for full interest forgiveness or a discount on the balance. Many products have no prepayment penalty and some offer prepayment discounts. Check your customer agreement or ask your account manager.

Renewals and additional funding

Source: https://sbgfunding.com/faqs/

Most clients become eligible for additional financing once they have paid down 40% to 50% of their balance, sometimes sooner. Contact your Relationship Manager or call 844-284-2725. Line of credit customers can also request a limit increase as the business grows and shows consistent repayment.

If revenue drops or a payment will be hard to make

Source: https://sbgfunding.com/resources/unlock-business-potential-with-mca-loans/

Talk to your provider early. If revenue drops, call before a payment is missed; it is much easier to adjust a schedule ahead of a problem than after one. Existing customers should contact their Relationship Manager at 844-284-2725 as soon as they anticipate difficulty. Budget around fixed daily or weekly payments, keep a cushion for payroll, rent and suppliers, and avoid stacking several advances from different providers.

8. Reputation and customer stories

Ratings and recognition

Source: https://sbgfunding.com/

As published by SBG Funding in October 2026:

- Trustpilot: 4.9 rating (about 5,000 reviews).
- Google: 4.9 rating.
- Better Business Bureau: A rating; SBG describes itself as BBB accredited.
- Inc. 5000: honoree five consecutive years (2022 to 2026).
- Approval rate: 85%, as stated on SBG's website.
- Customers frequently mention responsive, knowledgeable advisors and clear communication.

What independent reviewers report

Source: https://www.bankrate.com/loans/small-business/reviews/sbg-funding

Summarized from third-party reviews (Bankrate, Business News Daily, Finder, LendingTree and ConsumerAffairs) as retrieved in October 2026. Third-party reviews of SBG Funding are generally positive but date-sensitive and sometimes inconsistent with each other. Bankrate's review (February 2026) scores SBG 4.6 out of 5. Reviewers praise the fast application, broad product range and customer service. Reported figures for minimum revenue, credit scores and loan limits differ between reviewers and from SBG's own current terms, and LendingTree notes that SBG quotes monthly or weekly rates rather than an APR, which makes comparisons harder. SBG's own published terms (500+ FICO, 6+ months, $150,000+ revenue, soft pull only) take precedence over third-party summaries, and any figure from a review should be confirmed with an SBG advisor.

Customer stories

Source: https://sbgfunding.com/customer-stories/

- Kinn Thai (restaurant, Chelsea, Manhattan): funding for new kitchen equipment to expand the menu, available within 24 hours.
- DugOut BX (bar and restaurant across from Yankee Stadium, Bronx): a full front-bar renovation (flooring, ceilings, lighting and AC), funded the same day.
- Breuckelen Athletic (gym, Brooklyn): a business line of credit for payroll, a build-out, materials and equipment when moving into a larger space.
- Mama Mia 44SW (family restaurant, Hell's Kitchen): covering year-end payroll while recovering after COVID.
- The Quarry (James Beard Award-winning restaurant, Monson, Maine): enclosing the porch for year-round seating and buying a generator.
- Unlimited Concept Construction and Management (remodeler, Pennsylvania): short-term financing with monthly payments sized around the busy season, used for marketing.

- RJ Networks (telecom and IT, Michigan): equipment for large projects, marketing and a sales hire.
- Smart Homz (home technology): expansion into new markets and work toward a franchise model.
- Smith Grain Company (grain buyer, Tennessee): praised the personal service of a representative who stayed with them through the process.

9. Glossary

Financing terms explained

Source: https://sbgfunding.com/resources/

- Advance: a lump sum provided upfront, as in revenue-based financing, repaid from future sales.
- APR (annual percentage rate): the yearly cost of borrowing including interest and certain fees.
- Collateral: a specific asset pledged to secure financing that the lender can claim if it is not repaid.
- Draw: money taken from a line of credit; interest applies only to drawn amounts.
- Factor rate: a decimal multiplier (for example 1.25) applied to the amount funded to set the total repayment.
- FICO score: the most common personal credit score, from 300 to 850. SBG's minimum is 500 (600 for a HELOC).
- Gross revenue: total sales before expenses; SBG's minimum is $150,000 over the last 12 months.
- Hard credit pull: a credit inquiry that can lower a credit score; SBG does not perform one.
- Soft credit pull: an identity and credit check that does not affect the score; used by SBG when you apply.
- Loan-to-value (LTV): financing as a percentage of an asset's value; equipment financing reaches up to 90% LTV.
- Origination fee: a one-time fee for setting up financing.
- Personal guarantee: the owner's promise to repay if the business cannot.
- Prime rate: the benchmark rate banks charge their best customers; SBA 7(a) and HELOC rates are tied to it.
- Recourse: you remain responsible for repayment even if your customer does not pay an invoice.
- Revolving credit: credit you can draw, repay and draw again, such as a line of credit or HELOC.
- Term: the period over which financing is repaid.
- UCC filing: a public notice that a lender holds a security interest in business assets.
- Working capital: money used for day-to-day operations such as payroll, inventory and rent.
